Profile

When I'm not biking, I'm building cool stuff. Full stack web developer looking for the right alignment of product, team, and vision.

Experience

Founder   07/2019 – present
Techsbox   Austin, Texas
Developed an affordable and simple SaaS product for small electronic repair service businesses to manage their team and day-to-day operations more efficiently.

Senior Software Engineer   08/2015 – 04/2019
Sumo.com   Austin, Texas
Played an integral role in scaling the product from one that simply collected emails to a full on email service provider enabling users to easily create and send email campaigns to their subscribers.

Lead Developer   08/2013 – 07/2015
Bouncing Pixel   Houston, Texas
Lead the development of several high-profile client web projects, starting from the initial client meetings through to the delivery of the completed product.

Founder   01/2012 – 12/2013
Mote Labs   Houston, Texas
Developed browser extension to enable users to control their smart televisions from a laptop. Grew app to over 40,000 daily active users. Pitched and participated in a Microsoft startup accelerator.

Research Assistant   08/2010 – 05/2011
University of Houston   Houston, Texas
Worked in the Quantitative Imaging Laboratory studying various methods of background subtraction used in computer vision libraries like OpenCV. Built demo apps with C++ and Qt.

Cofounder   09/2009 – 09/2010
Digital Crisis Inc   Houston, Texas
Brought in a majority of the initial customers through the design and development of a search engine optimized site and a door-to-door flier campaign that drove even more traffic to the site.

Tech Lead   09/2009 – 09/2010
Friendly Computers   Webster, Texas
Managed team and daily business operations. Designed a workbench that quadrupled individual technicians' output and became the standard tech bench for all new franchised locations.
